Reinsurance Edit
“R295 Medicare Reported But Not Indicated”
Reinsurance will now deny

Third Party Liability Referral Reminder

CN1 Indicator to Sub Cap Code Mapping Issue

Reinsurance associated Encounters that span AHCCCS Contract Years

R295 MEDICARE Information Reported but not Indicated

We are reviewing specific Reinsurance Edits and will now be denying those associated Reinsurance encounters editing for “R295 Medicare information reported but not indicated”. This will eliminate the necessity to review the associated Reinsurance encounter each month. The Contractor will then be responsible for the correction to the Encounter.

Third Party Liability Referral Reminder

Effective on 10/01/2005 AHCCCS stopped accepting paper Third Party Liability (TPL) referral information. Contractors must use either the PCG web-referral page or the AHCCCS

FTP server. For contractors wanting to utilize the FTP server, please contact Kathy Bezon at (602) 417- 4644. The

PCG Web Based Referral is at:

<https://cmts.pcgus.com/tplreferrals/>

CN1 Indicator Mapping Sub Cap Code Issue

The recent mapping of the Encounter CN1 Indicator to the AHCCCS Sub Cap Code, in some instances, is incorrect. The Reinsurance Manager has identified the issue and written a System Service Request (SSR).

At the time the database is updated we will run a program for those Reinsurance associated encounters to be re-priced.

Reinsurance associated Encounters that span AHCCCS Contract Years

The Reinsurance database will not recognize adjudicated encounters when the reported dates of service span AHCCCS contract years. The Contractor must split the encounter to be considered by Reinsurance.

Regular Acute Care (RAC) Reinsurance will associate adjudicated encounters that reflect dates of service for Prior Period Coverage and Prospective enrollment.

The Reinsurance associated encounter will edit for
“R800 PPC ENROLLED RECIPIENT NOT ELIGIBLE FOR ACUTE RI BEGINNING 10/01/03”
and should be split to be considered by Reinsurance.
